

Luis David Zanabria Ruiz

COMPUTER SYSTEMS ENGINEER

EDUCATION

2017-2021	Computer systems engineering Instituto Politécnico Nacional
2013-2016	Computer programmer technician Universidad Bancaria de México

MAJOR PROJECTS

Classification and recommendation of pre-packaged products
Mobile application to recommend less harmful pre-packaged products.

- Participated as backend and frontend developer
- UX Designer and data analyst
- Implementation of classification algorithms
- Primary Tools and languages: Android Studio, Weka, Git, Github, Java, SQL and Python

COURSES AND CERTIFICATES

February – May 2022	Data Analytics Professional Certificate Google
May – July 2022	Project Management Professional Certificate Google
May – July 2022	Data Science Specialization Johns Hopkins University
May – Present 2022	Data Science BEDU + Santander Universities

TECHNICAL SKILLS

Software:

- Data processing and analyzing: Excel, RStudio, Matlab, GNU Octave
- Database managers: MySQL, SQL Server, PostgreSQL and MongoDB
- Data visualization: Tableau, Power BI
- Version control system: Git (Command line and GUI software like Gitkraken and Github Desktop)

Programming languages and libraries:

- Python (NumPy, Pandas, Matplotlib, TensorFlow 2, Sci-Kit Learn)
- R (Tidyverse libraries)
- M language (Used in Matlab and GNU Octave)
- SQL
